

End Sealant

1525-02080 3 oz. Tube
1535-02120 10.3 oz. Cartridge

Providing excellent resistance to weather, ozone, oil, many chemicals and extreme temperatures (-65°F to 450°F), DEKORON®/Unitherm™ End Sealant is a paste which forms a tough, rubbery seal upon exposure to air. Simply the best way to seal DEKORON®/Unitherm™ tubing bundles.

Important Note: All DEKORON®/Unitherm™ steam products are sealed at the factory. These seals must be maintained during storage and the bundle ends sealed upon installation. DEKORON®/Unitherm™ will not assume liability for corrosion or damage to the product caused by failure to maintain seals.

Installation Instructions

1. Cut the end of product square, expose desired length of tube.
2. Push back insulation under jacket to a depth of 1/4".
3. Apply a sufficient amount of End Sealant to fully cover the insulation to a depth of 1/4".

One 3 oz. tube will cover an average of 6 product ends.
One 10.3 oz. cartridge an average of 20 product ends.
